

Master Thesis ideas, Peder Andersen

My research interests:

fisheries economics, fishery management, uncertainty and imperfect information, enforcement and compliance, environmental economics.

Master thesis ideas:

1. Fisheries economics – focus on management systems under imperfect information.

a. A theoretical thesis as well as an empirical thesis are possible

2. The economics of enforcement and compliance

a. The enforcement problem is relevant in environmental policy as well as in fisheries policy

3. Landing obligation (LO) in fisheries management

a. LO is a major component of EU fishery policy

4. Taxation of resource rent

a. Can be linked to fishery, exhaustible resources or both.
